J2 225 wifi card installation

Fasten the two antennae to the metal base in the positions shown with the double sided tape provided. The antennae should fit up against the plastic side of the LCD surround but not over the edge of the plastic.

Run the two cables in the positions shown, care should be taken to route the cables as shown.

Fasten the antennae connectors to the wifi card, the cables can be attached to either connector.

The back cover, bezel. Hard drive & stand can now be refitted.
