- > Power from POS system

Benefits

- > Crisp Bright Large Customer side display
- > Great for upselling adverts
- > Cost Effective
- > Reliable

J2 102 10.1 Inch Customer Side Display

A versatile large customer sided display

The J2 102 is an exciting new generation of POS monitor. With a modern slim zero bezel design the J2 102 provides a clean looking clear and bright display. Using the newer 10.1 inch LED backlit 16:9 screen allows for large customer side display but a smaller overall physical footprint.

The J2 102 comes in two versions, one specifically designed to work with the J2 225 as a fully integrated secondary customer side display. The other version is designed to work with the all other new J2 products which includes the J2 625/680/680L/480/480L/485 and even the J2 225 when used in as a pole mounted external display.

This large customer side display has many uses such as replacing VFD/LCM line displays and is large enough to display for customer order verification information. Also great for upselling ads and general advertising.

**All J2 products
are RoHS and
WEEE compliant**
